# SHEETROCK® EASY SAND™

## Description

**SHEETROCK® Easy Sand™** is a lightweight, plaster based setting type compound formulated for the bedding of plasterboard joints, angles and spotting fastener heads when used in conjunction with USG Boral Finishing Compounds. It weighs up to 25% less than conventional setting type compounds and provides very easy sanding and low shrinkage, making it ideal for heavy fills and patching jobs. SHEETROCK Easy Sand mixes up to a lightweight creamy texture and is suitable for achieving a smooth plasterboard joint finish.

## Specifications

Feature	Description
Colour	White
Working Time	Setting Type: Available in 45 min and 20 min working times
Packaging	16 Kg and 8.1Kg bags
Coverage	13Kg / 100 sqm board
Manufacture	Compound is manufactured to stringent USG Boral product quality control specifications

## Advantages

- Lightweight
- Easy sanding
- Resists shrinkage and edge cracking
- Consistent working times
- Easy scrape back

## Recommended

Easy Sand is suitable for base coating plasterboard joints, angles and fastener heads when used in conjunction with USG Boral Finishing or All Purpose compounds.

Easy Sand is recommended for use as the first and second coat in USG Boral three coat jointing systems.

Easy Sand™ also comes in smaller pack sizes with short working times for patching purposes

## Installation

Refer to USG Boral Website [USGBoral.com](http://USGBoral.com) or call TecASSIST™ on **1800 811 222**.
